Surabaya, Indonesia

Bachelor of Information Systems graduate with professional internship experience as a Fullstack Web Developer and Backend Developer. Skilled in building end-to-end web applications using Laravel, including requirements analysis, system design, RESTful API development, database design and optimization, application testing, and deployment. Experienced in developing ERP systems and content automation platforms while implementing technologies such as RBAC, Queue Jobs, Task Scheduling, Redis Cache, Web Scraping, and Instagram Graph API. Currently enhancing frontend development skills through personal projects with Next.js to further strengthen expertise as a Fullstack Web Developer.

EDUCATION

Universitas Pembangunan Nasional “Veteran” Jawa Timur - Surabaya, Indonesia

2022 – 2026

Bachelor of Information Systems, GPA: 3.83/4.00

- Relevant Coursework: Web Programming, Mobile Application Development, Desktop Application Development, Database Management, Data Structures & Algorithms, UI/UX Design.
- Technical Skills: Laravel, Next.js, jQuery, PHP, JavaScript, SQL, Java, Python, HTML, CSS.

WORK EXPERIENCE

PT. Angsar Inspirasi Digital - Sidoarjo, Indonesia

Jan – June 2026

Fullstack Web Developer Intern

Digital innovation and business consulting company specializing in data-driven business transformation and technology solutions for SMEs.

- Developed an end-to-end Promotion Automation System that transformed manual content management and publishing into a semi-automated workflow, improving administrative efficiency.
- Participated in the full Software Development Life Cycle (SDLC), including Product Requirements Document (PRD) preparation, Entity Relationship Diagram (ERD) and Sequence Diagram design, application development, and Black Box Testing.
- Developed backend services using Laravel and MySQL to manage web scraping, data processing, scheduling, and content publishing within an integrated system.
- Implemented automated web scraping using Guzzle and web crawlers to collect competition information as the primary content source.
- Built an automated workflow that transformed scraped data into publication-ready content, enabling administrators to focus only on reviewing, approving, and scheduling content before publication.
- Integrated the Meta Instagram Graph API to automate Instagram content publishing and developed a centralized workflow for publishing content to both Instagram and the company website.
- Implemented Laravel Queue and Task Scheduling to execute scraping, data processing, and publishing tasks asynchronously and on schedule without affecting application performance.
- Developed the application interface using Laravel Blade and Tailwind CSS, while optimizing database queries to improve system performance and maintain application stability.

PT. Ordo Teknologi Karya - Surabaya, Indonesia

Feb – June 2025

Backend Developer Intern

Software development company providing IT consulting, web and mobile application development, and ERP solutions for various clients.

- Contributed to the development and maintenance of multiple client web applications by adapting to business requirements and evolving project specifications throughout the development process.
- Developed RESTful APIs using Laravel and PHP to support ERP system modules and enable seamless integration between backend and frontend services.
- Designed, managed, and optimized MySQL databases, including table relationships, indexing, and query optimization to ensure high performance and data integrity.
- Implemented Redis Cache, Laravel Queue Jobs, and asynchronous processing to improve application performance and data processing efficiency.
- Developed supporting features, including PDF generation using DOMPDF, automated email notifications via SMTP, and Role-Based Access Control (RBAC) to enhance application functionality and security.
- Performed backend API testing using Laravel Test and Postman to ensure service quality, reliability, and stability.
- Collaborated with frontend developers and QA engineers to integrate features, resolve bugs, and deliver solutions based on testing results and client feedback.

PROJECTS

Olimportal - Fullstack Web Developer (PT Angsar Inspirasi Digital)

Content automation platform that manages the entire competition content production and distribution workflow, from web scraping and data processing to automated scheduling and publishing on both the website and Instagram.

Key Contributions :

- Developed the application end-to-end, including requirements analysis, system design, development, and testing.
- Built an automated web scraping system using Guzzle to collect competition information from multiple sources.
- Developed a content automation workflow that transformed scraped data into publication-ready content, allowing administrators to focus only on reviewing, approving, and scheduling content.
- Integrated the Meta Instagram Graph API to automate content publishing on Instagram.
- Implemented Laravel Queue and Task Scheduling to execute scraping, data processing, and publishing tasks asynchronously.

Technologies: Laravel, PHP, MySQL, JavaScript, Tailwind CSS, AJAX, DataTables, Guzzle, Meta Instagram Graph API
Demo: Private (Company Internal System)

FUOMO - Backend Developer (PT Ordo Teknologi Karya)

Creator monetization platform that enables creators to share and sell exclusive content—including photos, audio, and illustrations—while building engagement with their supporters.

Key Contributions :

- Developed and maintained backend features across multiple application modules using Laravel.
- Built and integrated RESTful APIs to support frontend functionality.
- Improved application performance through database query optimization and Redis Cache implementation.
- Performed bug fixing based on QA testing results and client feedback to ensure application stability and reliability.

Technologies: Laravel, PHP, MySQL, JavaScript, jQuery, AJAX, Redis
Website: <https://fuomo.id>

ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM) - Faculty of Computer Science, UPN "Veteran" Jawa Timur Apr 2024 – Feb 2025
Vice Head of Arts and Sports Division

- Led the Arts and Sports Division in planning, organizing, and coordinating faculty-level programs and student activities.
- Managed team coordination and task delegation to ensure activities were executed according to project plans and objectives.
- Collaborated with fellow Student Executive Board members and faculty representatives to organize events and increase student engagement.

SKILLS

Technical Skills	Frameworks & Libraries : Laravel, Livewire, Next.js, React, Tailwind CSS, Bootstrap, jQuery, AJAX, DataTables, DOMPDF, Guzzle Database: MySQL Programming Languages : PHP, JavaScript, Java, Python Web Technologies : HTML, CSS, Blade Backend Development : RESTful APIs, Laravel Sanctum, Queue Jobs, Task Scheduling, Web Scraping & Crawling, SMTP/Email Integration Tools : Git, GitHub, Postman, Laragon, TablePlus, Visual Studio Code, Figma
Professional Skills	Public Speaking, Time Management Expert, Project Management, Event Management, Critical Problem Solver, Competition Organization, Communication and Collaboration, Teamwork and Leadership.
